

Managing Search Results

You can perform several actions on the **Search Results** panel as described in the following procedures.

Important:

- In "mobile" resolution (screen width below 700 px), you only see the **Sort** and **View** actions. All other actions, including multiselection, are available in "desktop" mode only (screen width above 700 px).
- 3DSearch provide these actions for the **Document** type only, with the **Document Release** policy. It does not support other types.
