What's New

This page describes recent changes in 3DSearch.
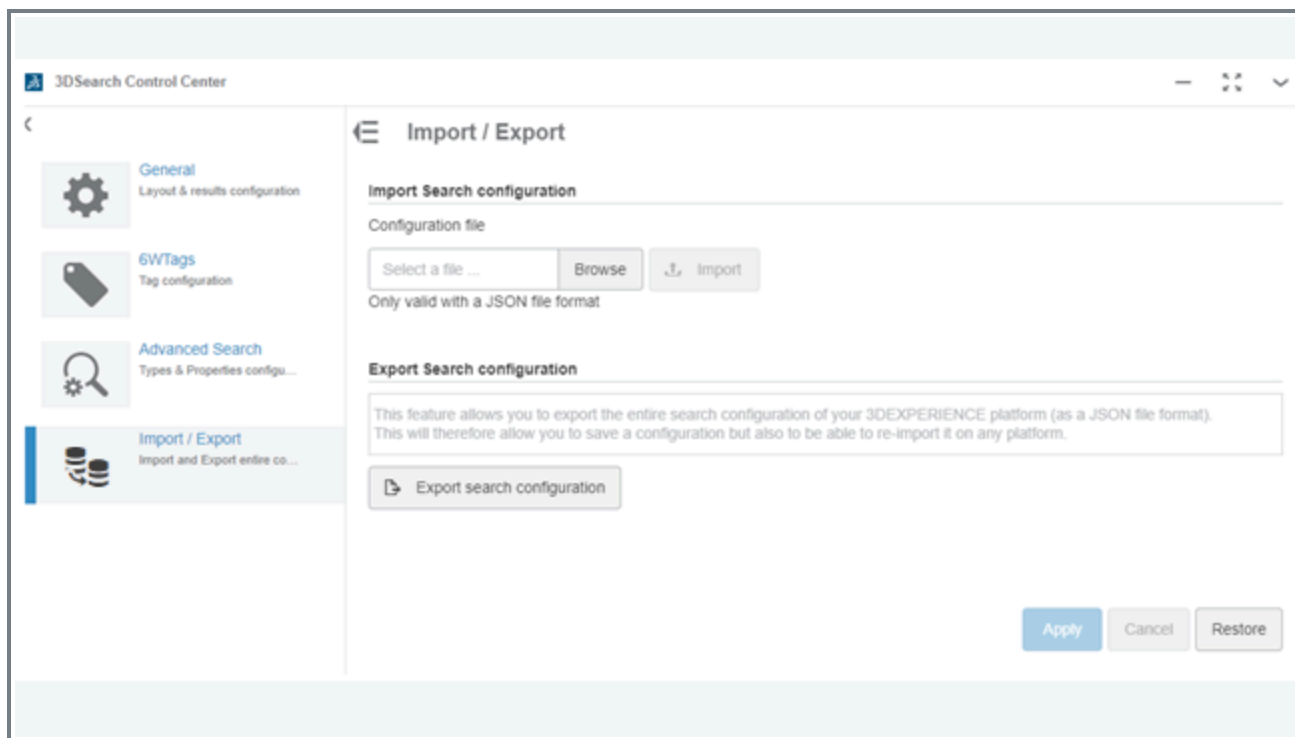

- R2024x FD02
- R2024x FD01

R2024x FD02

Import and Export the 3DSearch Control Center Configuration

You can export all the behavior changes that you made in a `JSON` file. You can then import this file into the 3DSearch Control Center app of another platform.
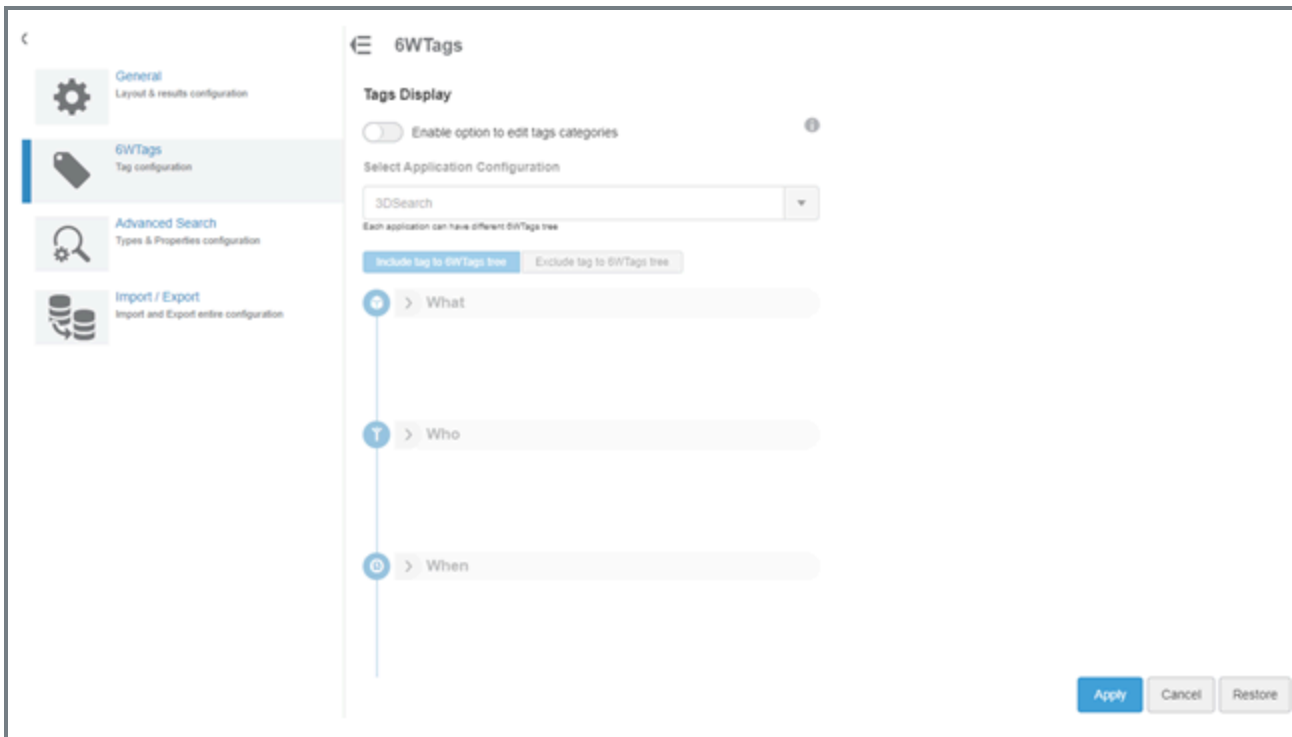

Benefits: Save time when you want to replicate a configuration from one platform to another.

Related topics: Import and Export the 3DSearch and 6WTags Configuration.

Redesigned 3DSearch Control Center

The look and feel have been redesigned to match with the platform. No features have changed.

Benefits: Visual improvements.

Company Tags and Controlled Vocabulary

You can select an existing ontology to enable the **Company Tags** category of the 6WTags panel with the tags of your choice, and you can allow users to only create company and community tags.

Benefits: Use tags that are relevant to your company and reduce tag noise.
